A bubble chart showing the relative importance of different crops. The bubbles are arranged in a triangular pattern, with 'Maize' being the largest, followed by 'Bajra', and 'Gram' being the smallest.

Black pepper Coriander (Lobelia) other oils/seeds Tap
Ragi other Kharif pulses Sweet potato Banana
Adomam Small millets Cotton (lint) Sunflower Coriander
Soybean Sugar cane Onion Rapeseed & Mustard
mp Gram Moong (Green Gram) Arhar/Tur
ta
Sesamum Garlic Peas & beans (Pulses) Wheat Sa
Dry chillies Maize Jrad Groundnut Nigella
Castor seed Other Summer Pulses Potato Horse gram
Cashewnut Other Rabi pulses Oilseeds total Barley
Dry Coconut Oilseeds

The chart displays the Kharif rice yield in India as a percentage of the total rice yield from 1998 to 2020. The yield starts at 2.801% in 1998, remains relatively stable until 2003, then shows a general upward trend with some fluctuations, reaching a peak of 0.087% in 2019. The yield for 2020 is also 0.087%.

Year	Kharif Rice Yield (%)
